

ENVIRONMENTAL STUDIES

COURSE OUTCOME

UNIT-1 : Introduction to environmental Studies

CO1- Students can learn the multiple sides of nature.

CO2- students can get the knowledge of Sustainable development.

UNIT-2: Ecosystems

CO1- Students can learn about multiple types of Ecosystem.

UNIT-3: Natural Resources: Renewable and Non- renewable Resources

CO1- They can learn about the land resources as well as the soil erosion.

CO2- Students can learn about deforestation .

CO3- Students can learn about the proper usage of water resources.

CO4- Students can learn about the usage of food resources.

CO5- Students can learn about the renewable and non- renewable energy.

UNIT- 4: Biodiversity and Conservation

CO1- Students can achieve the knowledge on biodiversity.

CO2- Students can learn about varied Mega-diversity of India.

CO 3- Students can learn about the conservation of bio-diversity.

CO4- Students can achieve the view of the social and ethical value of bio-diversity.

UNIT-5: Environmental Pollution

C01- Environmental pollution may be learnt by the students.

C02- Students can learn about various hazards and health risks.

C03- Students can learn about the various types of pollution of the nature.

UNIT-6 : Environmental policies and Practices

C01- Students can learn about the climate Change.

C02- Students can learn about the Laws based upon environment.

C03- Students can learn about the nature reserves.

UNIT- 7 : Human Communities and the Environment

C01-Students can learn about the population and it's growth.

C02-Students can learn about the disaster management.

C03- Students can learn about the water conservation.

C04- Students can learn about the process of the recycled usage of west land.

C05-Students can learn about the multiple types of environmental movements.

C06- Students can learn about the environmental values.

C07- Students can be aware of the nature and they can learnt about the relationship with nature.

Field Work

C01- Knowledge of local pollution can be obtained.

C02- Students can learn about the flora and fauna.

C03- Students can learnt about environmental assets.

C04- Students can learn about the study of ecosystems.
