

**Sky Observation Centre  
Department of Geography  
Maynaguri College**

The main objective of the Sky observation centre is to acquaint the students with the celestial objects. There are two telescopes to observe the sky – one is Newtonian Telescope and another one is Refractive Telescope. The major features events observed by this centre include –

1. Lunar Eclipses
2. Solar Eclipses
3. Transit of Mercury over Sun
4. Observation of Blood Moon and Blue Moon etc. and other celestial events.
5. Stellarium Software
