Values determine and regulate human's conduct, enable him to stand life's stress and strain and define his relationship with his fellow-beings. Values shape a human's character and make him divine or devilish. In present situation it will be difficult to find a person whose has no desire. Every social human being has some desires. If we fulfill our desires ethically or lawfully, there is no harm. But when people cannot control his desire and cannot differentiate with greed, in that time problem arises. A person has the right to be happy, but he has no right to harm another person to achieve happiness. Humanity and morality are the two sides of the same coin. Humanity without morality or morality without humanity is not only incomplete but also imperfect. So the practice of ethical conduct is still very important and useful to our civilization. Webinar ended with vote of thanks to our resource persons, chair and participants by the departmental teachers of Philosophy – Sushil Mandal, Biswajit Basak and Suparna Dutta.

This Webinar was held on pandemic situation of Covid-19. It was a test of medical capacity and political will. It was a test of endurance and forbearance; for believers and it was a test of religious faith. It was a test, too, of a different kind of faith, in the strength of the ideas humans choose to help them form moral judgments and guide personal and social behaviour. The epidemic forces everyone to confront deep questions of human existence, questions so profound that they have previously been answered, in many different ways, by the greatest philosophers.
